Senior Workers

Risks of accident caused by the physical deterioration by aging

Heatstroke

Risks of heatstroke due to the extreme heat work environment

Preventing accidents in worksite

Avoiding fatalities by instant detecting and alerting

➤ Examples of detection on current machines

Safety Awareness

According to a questionnaire conducted at a factory that introduced DecoBull, more than 80% of workers answered they became to take precaution for heatstroke.

Instant Rescue

DecoBull detected a worker's stepping into a gap in the equipment as a fall. Immediate alert to nearby workers and supervisors enabled the instant rescue.

For further relief, safety, and wellbeing
